LOUDON ROAD WATER MAIN REPLACEMENT

On Monday, September 30th, the contractor will relay water services on Loudon Road in the vicinity of Gates Street. On Tuesday, the water main on Ellsworth Street will be shut down to connect the existing main to a new 12-inch main on Loudon Road, followed by the Drew Street connection on Wednesday. On Thursday night, the contractor will either continue relaying water services east of Gates Street or work on raising the buried drain manhole covers opposite Jiffy Lube.

ROUTE 3 CORRIDOR IMPROVEMENTS

Next week, the contractor will complete driveway pavement joint trimming and final preparation for the full width wear course pavement overlay. The paving is tentatively scheduled for Wednesday, October 2nd. Paving the main line of North State Street between Abbottville Road and Penacook Street will take about two days to complete. After completion of the main line paving, work will progress to paving of the driveway aprons. Significant delays are to be expected during roadway paving operations. Drivers are encouraged to seek an alternate route if possible.

PENACOOK UTILITY INFRASTRUCTURE IMPROVEMENTS

Underground utility work continues in Penacook Village. Liberty Utilities has completed their portion of the work. The bridge work has begun and parking along the bridge has been eliminated in order to allow for two-way traffic flow during construction.

RECONSTRUCTION OF CITY HALL STAIRS

Reconstruction of the City Hall stairs, which was to have begun on September 23rd, has been delayed until Wednesday, October 2nd. This work is expected to take approximately four weeks to complete. While the steps are under construction, the public and City staff will be detoured to the side door of City Hall.

The mail slot on the front door of City Hall will not be available during this time as well. Payments may be made at the Collections Office or placed in the drop box in the lobby during normal business hours; online at www.concordnh.gov; or by mail.

2013 AUDI PITCH IN

The 23rd Annual Pitch In to prepare the Audi for the 2013-2014 season was a great success. A total of 115 volunteers worked provided a total of 555 hours of labor. Using the US Department of Labor values for volunteers (\$20.25/hour), the Pitch In contributed \$11,238.75 in labor support for the Audi.

Projects included painting the lobby doors and outside trim; repairing damaged seats; refurbishing the stage curtains; and upgrading the sound system.
